

AI-Powered HRMS & Recruitment Platform

Overview

The AI-Powered HRMS & Recruitment Platform is an enterprise recruitment and employee onboarding solution developed using OutSystems ODC.

The platform uses AI-based resume parsing to automate candidate screening and profile creation, significantly reducing manual recruitment effort. It manages the complete employee lifecycle from hiring requests and candidate applications to onboarding, employee creation, and workforce access management.

The solution consists of two integrated applications:

HRMS Portal (Internal Application)

Access Link - [HRMS Portal](#)

Used by HR teams, recruiters, interviewers, account managers, and employees to manage recruitment, onboarding, and workforce processes.

Jobs Portal (Public Application)

Access Link - [Job Portal](#)

A public recruitment portal where candidates can browse jobs, submit applications, upload resumes, and complete onboarding activities.

[Overall Application Architecture Diagram]

Key Feature – AI Resume Parsing

The primary feature of the platform is its AI-powered resume parsing engine.

Instead of manually reviewing resumes, recruiters receive structured candidate profiles automatically generated through an external AI Resume Parsing API.

AI Processing Flow

Resume Uploaded

AI Resume Parsing API

Information Extraction

Candidate Profile Creation

Recruiter Review Dashboard

The AI engine extracts:

- Personal details
- Contact information
- Skills
- Work experience
- Education
- Certifications
- Previous employers

Benefits

- Faster candidate screening
- Reduced manual effort
- Improved shortlisting process
- Consistent candidate evaluation

JOB POSTINGS

Title	Description	Required Skills	Experience Required	Apply
Finance Analyst	Finance expert to handle project finances	financial reporting, budgeting processes, presentation of financial statements	4	
Project manager	For managing software & IT infrastructure projects	software implementation projects, financial services software, IT industry experience	6	
Reactjs developer	Senior Reactjs developer	Reactjs, HTML, CSS, Tailwind CSS	4	
Senior Accountant	Senior accountant to manage payments	Accounts , Tally , Payment Options	4

Recruitment Management

Hiring Requests & Job Postings

- Account Managers create hiring requests.
- HR creates and manages job postings.
- Job postings can include links to LinkedIn, Glassdoor, and other recruitment platforms.

Candidate Evaluation

Recruiters can:

- Review parsed candidate information
- Preview resumes
- Shortlist candidates
- Reject candidates

Interview Management

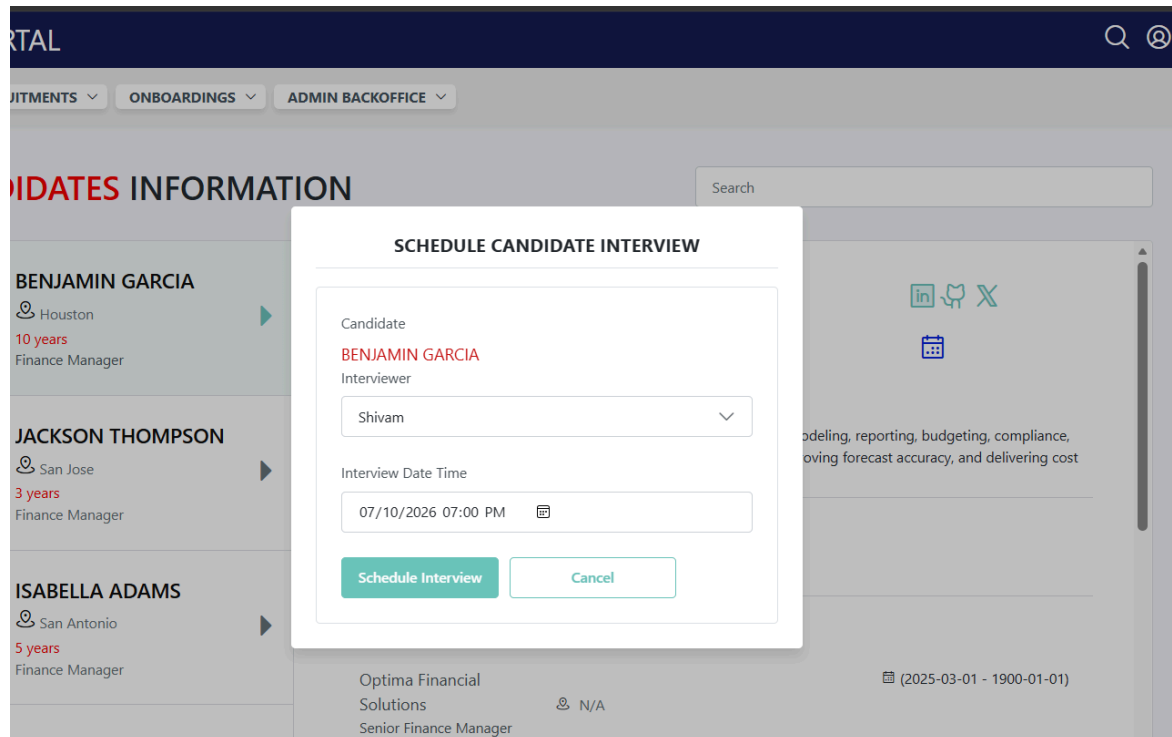

Shortlisted candidates can be invited for interviews.

Features include:

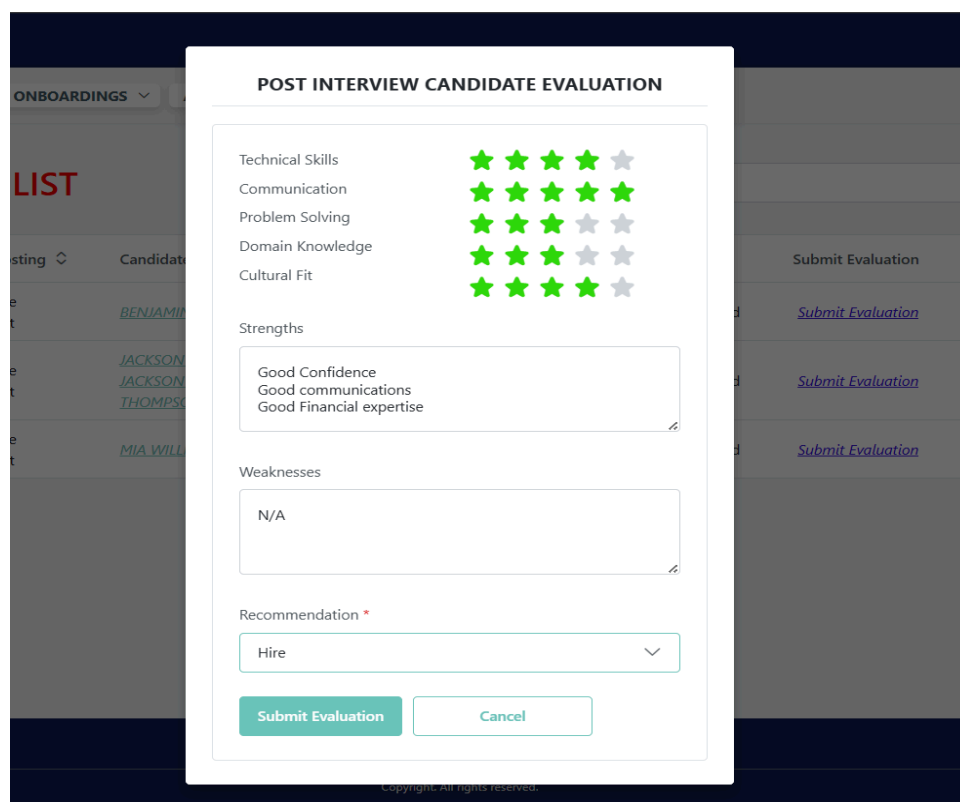

- Interview scheduling
- Interview rescheduling
- Automated email notifications
- Meeting link distribution
- Interview evaluation submission

Interviewers can provide recommendations:

- Hire
- Hold
- Reject

[Interview Scheduling Popup]

[Interview Evaluation Popup]

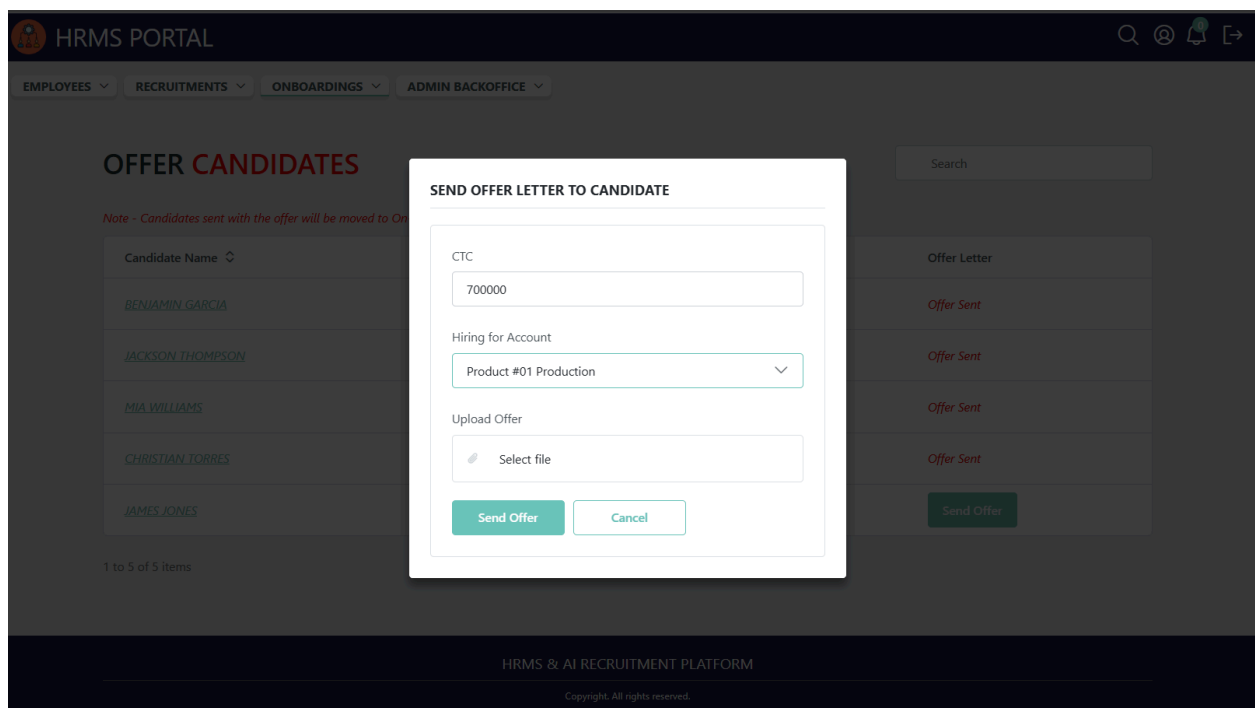

Offer Management

Selected candidates move into the offer stage.

Features:

- Offer generation
- Offer letter attachment
- Offer acceptance workflow
- Offer rejection workflow

Candidates receive offer details and can accept or reject through email links.

[Offer Management Screens & Popup]

Employee Onboarding

After offer acceptance, an automated onboarding process begins.

Process

- Document submission reminders
- HR document verification
- Manager approval workflow
- Pre-boarding completion

Candidates upload required documents, which are automatically routed for verification and approval.

Employee Creation & Access Provisioning

A scheduled process runs daily and automatically:

- Creates employee records
- Generates Employee IDs
- Creates portal accounts
- Sends activation emails

Employees can then access the HRMS portal using their Employee ID and password.

The image shows a login screen for the HRMS Portal. It features a teal background with a white login card in the center. At the top of the card is a circular icon with a gear and three people. Below the icon is the text "HRMS Portal". There are two input fields: "Login *" and "Password *". The password field has a toggle icon for visibility. Below the password field is a link "Forgot your password?". At the bottom, there are two buttons: "Log in" and "Log in as Guest", separated by the word "or".

Automation & Background Processing

The platform includes automated background jobs for:

- Resume processing
- Document submission reminders
- Employee account provisioning
- Email notifications

These processes reduce manual intervention and improve operational efficiency.

Security

The application implements custom role-based access control.

Supported roles include:

- HR Administrator
- Recruiter
- Account Manager
- Interviewer
- Employee
- Guest Recruiter

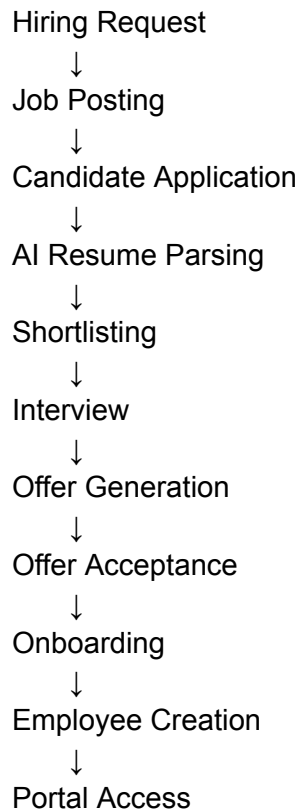

Authentication is performed using Employee Email and Password.
